

LENOIR

<https://lenoir.app>

INTRODUCTION

The Lenoir app is an App that respect the privacy of its users. Information about the data its users searched on net are not stored, in order not to make its users have an uneasy mind, that all of their activities are being watched.

Downloading Lenoir App will give you room to access more than a million Apps and all activities you do on those Apps will not be stored.

Lenoir also help its members mint Noir Token just by using the App. The token minted can be sent to their walle and can also be converted into USDT

STATEMENT OF PROBLEM

The internet has changed and it is crying out for innovation that is why we created LENOIR, the future of web browsing.

The privacy of Internet users is not given, because corporations, government and organization often monitor the information of internet users. The activities of every internet user on the internet are being watched by the government.

Large storage of internet data is created every per day to store internet activities of people around the world- through our social media posts, the things we search for on google, the things we buy, the forms we fill in and many more things we involve ourselves on the internet with

Much of the data collected is stored in different repositories, but third-party or fraudster tracking on popular sites has increased drastically, and by so doing many people are having an uneasy feeling that their everyday move is being watched.

Now most of us have nothing to fear from our governments, we are law-abiding citizens after all. But how would you feel if you knew your boss might potentially be able to see what you are doing on your work computer?

LENOIR PROJECT

Lenoir app doesn't infringe on the privacy of its user. In other words, we value and prioritize your privacy and thus, it doesn't collect any of your browsing data.

Enjoy a new experience with our website by navigating the internet and at the same time make some money. With Lenoir, you don't need to buy a separate app to mine cryptocurrency. You just browse the web like you always do, and mint as you go. With the Lenoir app, you will have access to more than ten million apps and you will be able to multi-task without any problem. By default, your settings are exclusively stored on your phone.

With the Lenoir app, you are going to have access to over ten million other apps. Exclusively, the Lenoir app provides its users with the extra benefit of mining Noir coins while using the browser app. This noir coin can as well be converted to USDT on the app site or even send to the Metamask wallet.

Lenoir is a web browser for Windows, Mac and Linux with over 10 million apps. With Lenoir you can access the same apps as Android and iOS from your desktop or laptop. You can also browse through a regular browser or a regular search engine without being tracked.

NOIR TOKEN

We plan on making our App users make some cash, by creating a crypto token. Lenoir App users will be able to meet our token on the Lenoir app. Noir Token can be minted and converted to usdt and you can as well send it to your metatask wallet.

Lenoir has developed a seamless browser-mining experience, which lets you use your favourite websites like Google and Facebook while generating precious cryptocurrency on the other side. You don't need to download plugins or apps. Just install Lenoir, and begin minting today.

Noir Token is built on polygon.

Contract address: `0xad009ddaec78b3371f15403c9c69da113c22f708`

Total supply: 108,003

Decimal: 18

HOW TO ADD NOIR TOKEN TO YOUR METAMASK WALLET

- Go to Metamask APP on our website
- Create a wallet if you haven't
- If you have a wallet, just input your details on it
- Select "Add Token" MetaMask
- Add Noir Token it

Road Maps
